

Global Chem-feed Solutions LLC.

## COMPANY PROFILE

### **GLOBAL CHEM-FEED SOLUTIONS (GCS) MANUFACTURES:**

**Custom skid-mounted chemical dosing systems** for injection of chemicals into boilers, cooling water and process applications. Systems include skid-mounted tanks, pumps, piping, wiring and local control panels, completely assembled for “set in place” installation.

**Fugitive dust suppression systems** for material handling and storage pile applications. Treatment areas include unloading, crushing, transfer, load out and reclaim.

GCS systems are custom fabricated to meet customer applications. Conformance with applicable specifications and Industry Codes and Standards: e.g. ASME, ASTM, NEMA, NEC, UL, CSA, CUL, etc.

Project Submittal Drawings provided in SolidWorks/AUTOCAD 2013 Design with documents supplied in electronic document/hardcopy/CD format.

### **INDUSTRIES SERVED**

GCS provides custom equipment for Electric Generating Plant boiler, cooling, CCR applications, Hydrocarbon/Petrochemical Plants, and Heavy Industrial manufacturing plants.

### **EXPERIENCED PERSONNEL**

The owners, managers and employees of GCS are dedicated to customer satisfaction. GCS goal is to provide quality products, on schedule, with the best value for the customer.

Since the company founding in 2005, Global Chem-feed Solutions has assembled a seasoned team of skilled managers, engineers and craftsman. The dedicated team of experienced employees has earned GCS strong acceptance in the marketplace, resulting in uninterrupted growth.

## **SUMMARY OF SENIOR EXECUTIVE TEAM:**

**Managing Director, Bill Herbert, Jr.** was formerly a lead estimator for 17 years and QA manager for 10 years at a firm that manufactures custom skid mounted feed systems. He has been Managing Director of GCS since the company founding in 2005.

**Marketing Director, Bill Herbert, Sr.** was formerly the Sales Manager at a firm that supplies custom skid mounted chemical feed systems for more than 27 years. Prior to that, he was in chemical and systems sales at GE Betz for 10 years. He has been Marketing Director at GCS since the company founding in 2005.

**Engineering Manager, Bill McGurney** has Environmental Engineering degree with more than 20 years' experience in custom system design. He has been an Engineering Manager at GCS since the company founding in 2005.

**Sales Manager, Don Crawford** has over 25 years senior management experience in the water treatment industry, as past President of the Dearborn Division of WR Grace and Executive Vice-President at GE-Betz. He has been Sales Manager at GCS since 2009.

**Production Manager, Chris Herbert** has served as shop foreman for more than 20 years and has been an ASME IX code certified welder for 30 years. He has been Production Manager at GCS since the company founding in 2005.

Collectively GCS management personnel have more than 150 years of experience working with owners, engineering firms and contractors to produce high quality, cost effective products in a timely manner.

## **THE GCS STAFF:**

GCS staff includes mechanical, environmental and chemical engineers as well as experienced water treatment personnel as part of the technical department. All Project Engineers have years of experience working with custom systems contracts. Experienced production department personnel are experts in a variety of fabrication trades such as tubing, piping, wiring and welding.

## **QUALITY AND CERTIFICATIONS**

GCS Quality Assurance Program is ISO 9001:2008 compliant and is being upgraded to ISO 9001:2015. The program has been audited and accepted by major engineering firms and customers.

## **FACILITY**

The GCS office and manufacturing facility is located in Warminster PA, just north of Philadelphia. Conveniently close to interstate highway systems, GCS exports from the ports of Philadelphia, New York, Newark, NJ and Baltimore, MD. Additional outside and inside storage is available.
